

# PRATYUISH KIRAN

## Senior DevOps | SRE | Platform Engineering | Cloud & Production Operations Leader

Bengaluru, India | +917259955733 | [pratyuish.kiran@hotmail.com](mailto:pratyuish.kiran@hotmail.com) | [linkedin.com/in/pratyuishkiran](https://www.linkedin.com/in/pratyuishkiran) | Immediate Joiner  
<https://pratyuish.github.io/>

### EXECUTIVE PROFILE

Technology and engineering leader with 17+ years of experience spanning software engineering, application/production support, DevOps, SRE, cloud and platform engineering. 7+ years focused on DevOps/Cloud/Platform Engineering, with hands-on leadership across AWS, Kubernetes, Terraform, CI/CD, observability, incident management, DR/BCP and production reliability. Experienced in leading teams, modernizing delivery platforms, improving availability and operational resilience, and partnering across Product, QA and Infrastructure in regulated, high-availability environments.

### LEADERSHIP & DELIVERY HIGHLIGHTS

**Leadership:** Led 5-6 engineers across integration, platform and production delivery; mentored teams on cloud, DevOps and operational best practices.

**Scale:** Supported 10 Kubernetes clusters, 10 client environments, 12 applications, 15 CI/CD pipelines, 40+ builds/day and ~250 developers.

**Reliability:** Maintained ~99.99% production availability; led incident/RCA, launch readiness, capacity, observability and resilience improvements.

**Automation:** Reduced repetitive operational effort by ~15%; eliminated 4-5 recurring deployment failures/month and improved deployment efficiency.

**DR/BCP:** Led Tier-1 recovery exercises with RTO 1 hour / RPO 15 minutes; improved warm-standby recovery from ~40 minutes to under 8 minutes.

**Operations:** Delivered ~2 production upgrades/month across enterprise client environments with structured change, CAB and release governance.

### CORE EXPERTISE

DevOps & Platform Engineering • Site Reliability Engineering (SRE) • AWS Cloud • Kubernetes / RKE2 / EKS • Terraform / Infrastructure as Code • Jenkins / GitLab CI/CD / Argo CD • Docker / Helm / JFrog / Bitbucket • Ansible / Python / Shell • Grafana / ELK / Datadog / OpenTelemetry • Production Operations & Application Support • Incident / Problem / Change Management • DR / BCP / HA / Capacity Planning • Team Leadership & Mentoring • Java / WebLogic / Enterprise Applications

### PROFESSIONAL EXPERIENCE

#### OpenBet | DevOps Lead / Integration Engineering Lead Sep 2021 - Present

- Lead a team of 5-6 Integration Engineers delivering new client rollouts, integrations, deployments and production readiness across regulated gaming environments in Europe, Canada and the US.
- Own delivery and operational coordination across ~10 Kubernetes clusters and 10 client environments, partnering with Product, QA and Infrastructure teams to improve stability, scalability and release execution.
- Drive CI/CD and platform automation across ~15 pipelines, 12 applications, 40+ daily builds and ~250 developer consumers using Jenkins, GitLab, Docker, Helm, Argo CD, Terraform, Ansible and cloud-native practices.
- Sustain ~99.99% availability through proactive monitoring, incident response, RCA, capacity/reliability reviews and continuous production hardening.
- Reduced repetitive operational work by ~15% through automation and process improvements; helped eliminate 4-5 recurring deployment failures per month.
- Coordinate approximately two production upgrades per month, including change planning, CAB governance, rollback readiness and cross-team execution.
- Mentor engineers on Kubernetes, AWS, Terraform, CI/CD, observability and operational best practices while balancing delivery, technical debt and reliability.

#### PAYBACK (Loyalty Solutions) | Application Support / Production Engineering

Jun 2019 - Sep 2021

- Supported high-volume loyalty platform services and improved production observability, troubleshooting and operational response for distributed applications.
- Built and scaled Grafana-based monitoring and log-analysis workflows; reduced Mean Time to Detection for application-layer DDoS traffic patterns from more than 45 minutes to under 60 seconds.
- Implemented automated Kubernetes CronJob-based analysis to detect anomalous traffic patterns using logs, trace identifiers and request behavior while reducing false positives.
- Worked across microservices, Kubernetes, monitoring, scripting and incident analysis to protect service availability and speed up production diagnosis.

#### State Street / State Street Global Advisors | Technical Lead - Production Support

May 2014 - Jun 2019

- Led 6-7 support/development engineers supporting business-critical financial applications and global production operations in an ITIL-aligned environment.

- Led DR/BCP exercises for Tier-1 transaction services with RTO of 1 hour and RPO of 15 minutes; validated failover using replication checks and synthetic end-to-end transactions.
- Improved warm-standby recovery from approximately 40 minutes to under 8 minutes through runbook, failover and operational-readiness improvements.
- Handled incident, problem and change management, production troubleshooting, scheduled job monitoring (AutoSys), release support and cross-region coordination.

## **Hewlett Packard (HP) | Java Software Designer / Application**

**Jan 2009 - May 2014**

### **Support**

- Spent four years in Java software design and development using Core Java, Struts and WebLogic, followed by application maintenance and production issue resolution.
- Supported enterprise client engagements including General Motors and Vodafone UK, building a strong foundation in software engineering, troubleshooting, change control and customer-facing delivery.

## **TECHNOLOGY STACK**

---

**Cloud & Containers:** AWS, Kubernetes, EKS, RKE2, Docker, Helm, Rancher

**IaC & Automation:** Terraform, Ansible, Python, Shell

**CI/CD & SCM:** Jenkins, GitLab CI/CD, Argo CD, Bitbucket, JFrog

**Observability:** Grafana, ELK, Datadog, OpenTelemetry, CloudWatch

**Operations:** Incident/RCA, SLI/SLO/Error Budgets, DR/BCP, HA, Capacity Planning, ITIL processes, CAB, AutoSys

**Development:** Java, WebLogic, Struts, SQL, scripting

## **EDUCATION & LEADERSHIP DEVELOPMENT**

---

- Professional Certificate / Executive Programme in Strategic Management - IIM Kozhikode (11-month programme; strategy planning & execution, corporate finance, sustainability)
- M.Tech - Software Systems - BITS Pilani (WILP)
- B.E. - Electronics & Control Engineering - Sathyabama University
- Manager Essentials Program - 2023
