PROGRAM

Manager Essentials Program |
2023

CORE EXPERTISE

- DevOps & CI/CD
- Platform Engineering
- Application Integration
- Java & Web Applications
- 3-Tier Architecture
- Cloud & Infrastructure
- Monitoring & Observability
- Incident Management
- Client Rollouts
- Team Leadership
- Regulatory Compliance

PRATYUISH KIRAN

Technology & DevOps Leader | Platform Engineering |
Application Integration

PROFILE

Technology and DevOps leader with 17+ years of experience spanning Java software engineering, enterprise web applications, application support, technical leadership, platform operations, application integration, CI/CD, client rollouts, and engineering team leadership. Proven career progression from hands-on Java Software Designer at Hewlett Packard to Technical Lead at State Street, technical/support leadership at PAYBACK, and DevOps Lead at OpenBet. Experienced in leading teams, improving delivery and operational processes, managing high-availability environments, and collaborating with global stakeholders across gaming, loyalty, financial services, and enterprise technology.

PROFESSIONAL EXPERIENCE

Hewlett Packard (HP) — Java Software Designer / Application Support

5 YEARS

Java Software Designer — First 4 Years

- Designed and developed enterprise web applications using Core Java 1.5 and the Struts framework.
- Developed and maintained web application components deployed on WebLogic Server.
- Applied object-oriented Java development practices to build maintainable and reliable application functionality.
- Used HP's internal code-quality tooling to identify code issues and maintain high development standards.
- Worked with project and client teams to understand requirements and deliver application functionality aligned with business needs.
- Contributed to enterprise application development for major clients including General Motors and Vodafone UK.

Application Maintenance & Support — Final Year

- Transitioned from primary development responsibilities to application maintenance and production support.
- Investigated and resolved application defects, technical issues, and website-related problems.
- Performed root-cause analysis and implemented fixes while maintaining application stability.
- Supported ongoing website operations and ensured timely resolution of reported issues.
- Collaborated with stakeholders to troubleshoot problems and maintain service continuity for client-facing applications.

State Street — Technical Lead

MAY 2014 – JUN 2019

- Led cross-functional teams delivering technology solutions aligned with investment-management strategies and business objectives.
- Managed short- to mid-term development initiatives from planning through implementation and production delivery.
- Managed a team of 6–7 support developers responsible for institutional, ETF, and mutual-fund websites across North America, Australia, Europe, and Hong Kong.
- Enhanced and supported SSGA intranet and internal applications used for publishing reports, data, and business content.
- Established monitoring mechanisms for feed-file processing and website updates, improving operational reliability.

PROGRAM

Manager Essentials Program |
2023

CORE EXPERTISE

- DevOps & CI/CD
- Platform Engineering
- Application Integration
- Java & Web Applications
- 3-Tier Architecture
- Cloud & Infrastructure
- Monitoring & Observability
- Incident Management
- Client Rollouts
- Team Leadership
- Regulatory Compliance

- Automated file-delivery processes to improve data accuracy, reduce manual intervention, and increase efficiency.
- Collaborated with geographically distributed teams to address region-specific requirements while maintaining consistent application performance.
- Managed production incidents and coordinated resolution activities to minimize downtime and maintain service continuity.
- Improved release-management processes, accelerating deployments while reducing operational risk.

PAYBACK — Loyalty Solutions

JUN 2019 – SEP 2021

- Managed technical support operations across multiple loyalty solutions and enterprise platforms.
- Developed training programs to strengthen technical capabilities and improve team effectiveness.
- Introduced process improvements that reduced support-ticket resolution time and improved operational efficiency.
- Coordinated technical engineering teams and customer-facing functions to improve integration and issue resolution.
- Led adoption and integration of new support tools to enhance operational productivity.
- Analyzed customer feedback and support data to identify recurring issues and opportunities for service-quality improvement.
- Established standardized troubleshooting and support practices across multiple platforms.
- Conducted regular reviews of customer complaints, performed root-cause analysis, and recommended corrective and preventive improvements.

OpenBet — DevOps Lead

SEP 2021 – PRESENT

- Lead a team of 5 Integration Engineers, managing end-to-end delivery for new client rollouts across the gaming sector.
- Oversee deployment and integration of gaming tools and applications, enabling seamless client onboarding and production readiness.
- Leverage DevOps practices to streamline CI/CD pipelines, automate deployments, and improve operational efficiency.
- Manage 3-tier application architecture with a focus on high availability, scalability, reliability, and performance optimization.
- Collaborate closely with Product, QA, Infrastructure, and other cross-functional teams to align technical delivery with project objectives and timelines.
- Implement monitoring and incident-management practices to improve system stability, operational visibility, and minimize downtime.
- Ensure technology implementations align with betting and gaming regulatory requirements across Europe, Canada, and the United States.
- Mentor and upskill Integration Engineers on DevOps practices, cloud platforms, deployment automation, and engineering best practices.

CAREER PROGRESSION

Hewlett Packard: Java Software Designer → **State Street:** Technical Lead → **PAYBACK:** Technical / Support Leadership → **OpenBet:** DevOps Lead

LEADERSHIP & DELIVERY STRENGTHS

- Engineering team leadership, mentoring, coaching, and technical capability development.
- End-to-end client onboarding, production deployment, operational readiness, and service stability.
- Cross-functional delivery across Product, QA, Infrastructure, engineering, and customer-facing teams.
