## EDUCATION

### Executive Course – Strategic Management

IIM Kozhikode | 11 Months |  
2025–2026

### M.Tech

Software Systems | BITS  
Pilani (WILP)

### B.E.

Electronics & Control  
Engineering | Sathyabama  
University

## EXECUTIVE CAPABILITIES

- Corporate Strategy
- Strategy Planning & Execution
- Corporate Finance
- Balance Sheet Understanding
- Corporate Sustainability
- DevOps & CI/CD
- Application Integration
- Platform Engineering
- 3-Tier Architecture
- Team Leadership
- Monitoring & Incident Management
- Client Rollouts

# PRATYUISH KIRAN

Technology & DevOps Leader | Platform Engineering |  
Application Integration | Strategy

## EXECUTIVE PROFILE

Technology and DevOps leader with 17+ years of experience spanning Java software engineering, enterprise applications, application integration, technical leadership, platform operations, CI/CD, client rollouts, and engineering team leadership. Recently completed an 11-month Executive Course in Strategic Management from IIM Kozhikode, strengthening understanding of corporate strategy, strategy planning and execution, corporate finance and balance-sheet fundamentals, and corporate sustainability. Combines technology depth with a broader business perspective to connect delivery, operational excellence, people leadership, and organizational strategy.

## EXECUTIVE VALUE PROPOSITION

- Translate business objectives into practical technology and delivery priorities.
- Lead engineering teams and client rollouts while maintaining reliability, quality, and operational discipline.
- Bridge software engineering, application integration, DevOps, platform operations, and stakeholder management.
- Apply strategic-management concepts to understand execution, financial context, sustainability, and long-term organizational value.

## PROFESSIONAL EXPERIENCE

### Hewlett Packard (HP) — Java Software Designer / Application Support

5 YEARS

- Designed and developed enterprise web applications using Core Java 1.5 and Struts.
- Developed and maintained application components deployed on WebLogic Server.
- Used HP code-quality tooling to identify issues and maintain high development standards.
- Worked with project and client teams to deliver functionality aligned with business needs.
- Supported client engagements including General Motors and Vodafone UK.
- Final year: moved to application maintenance and support; investigated defects, performed root-cause analysis, implemented fixes, and maintained website stability.

### State Street — Technical Lead

MAY 2014 – JUN 2019

- Led cross-functional technology delivery aligned with investment-management strategies and business objectives.
- Managed 6–7 support developers responsible for institutional, ETF, and mutual-fund websites across North America, Australia, Europe, and Hong Kong.
- Enhanced SSGA intranet and internal applications for publishing reports, data, and business content.
- Established monitoring, automated file delivery, managed incidents, and improved release-management processes.

### PAYBACK — Loyalty Solutions

JUN 2019 – SEP 2021

- Managed technical support operations across loyalty solutions and enterprise platforms.
- Developed training programs and strengthened technical capability across support teams.
- Introduced process improvements to reduce support-ticket resolution time and improve operational efficiency.

## EXECUTIVE CAPABILITIES

- Corporate Strategy
- Strategy Planning & Execution
- Corporate Finance
- Balance Sheet Understanding
- Corporate Sustainability
- DevOps & CI/CD
- Application Integration
- Platform Engineering
- 3-Tier Architecture
- Team Leadership
- Monitoring & Incident Management
- Client Rollouts

- Coordinated engineering and customer-facing teams to improve integration and issue resolution.
- Established troubleshooting practices, analyzed customer feedback, and performed root-cause analysis to drive service improvements.

## OpenBet — DevOps Lead

SEP 2021 – PRESENT

- Lead a team of 5 Integration Engineers, managing end-to-end delivery for new client rollouts in the gaming sector.
- Oversee deployment and integration of gaming tools and applications, enabling seamless client onboarding and production readiness.
- Use DevOps practices to streamline CI/CD pipelines, automate deployments, and improve operational efficiency.
- Manage 3-tier application architecture with focus on high availability, scalability, reliability, and performance.
- Collaborate with Product, QA, Infrastructure, and other stakeholders to align delivery goals and timelines.
- Implement monitoring and incident-management practices to improve stability and minimize downtime.
- Ensure implementations align with betting and gaming regulatory requirements across Europe, Canada, and the United States.
- Mentor and upskill Integration Engineers on DevOps, cloud platforms, deployment automation, and best practices.

## EXECUTIVE EDUCATION

Executive Course in Strategic Management — IIM Kozhikode | 11 Months | 2025–2026

- Corporate Strategy — understanding how organizations formulate strategy and create long-term value.
- Strategy Planning & Execution — connecting strategic intent with planning, execution, measurement, and organizational outcomes.
- Corporate Finance — practical understanding of financial statements, including balance-sheet creation and interpretation.
- Corporate Sustainability — understanding sustainability as part of responsible corporate decision-making and long-term strategy.
- Business Perspective — strengthened ability to comprehend corporate strategy and view technology decisions within a broader organizational context.

## CAREER PROGRESSION

Hewlett Packard — Java Software Designer → State Street — Technical Lead → PAYBACK — Technical/Support Leadership → OpenBet — DevOps Lead

## LEADERSHIP & DELIVERY STRENGTHS

- Engineering team leadership and mentoring
- End-to-end client onboarding, deployment, production readiness, and service stability
- Cross-functional collaboration across Product, QA, Infrastructure, engineering, and customer-facing teams
- Automation, monitoring, incident management, release governance, and continuous improvement
- Business-oriented technology thinking informed by executive education in strategy, finance, and sustainability
